

RALLY ESTONIA 2022 ENVIRONMENTAL POLICY

The organisers of WRC Rally Estonia 2022 promotes environmental awareness and makes every effort possible to ensure that the event causes as little ecological stress for environment as possible. We achieved the 2-Star Level of FIA Environmental Accreditation Programme in 2021 and will apply for the 3-star level in 2022. WRC Rally Estonia takes responsibility about climate change and carbon footprint in our field and continues offsetting emissions via compensation. Our goal is to reduce the environmental impact by monitoring performance indicators and taking remedies in the main impact areas. Partners will be involved to fulfilling our vision through communication and training. Relevant stakeholders have been identified and we cooperate to achieve the goal.

Regarding the FIA Environmental Programme, evaluating and reducing the environmental impact of motorsport is playing an integral role. Based on the FIA's recommendations the event organisation has improved the training of marshals, formal documentation and monitoring of the environmental performance. We have improved the monitoring of the event carbon footprint and waste management system and want to be a good example in terms of environmental issues nationally as well as internationally. WRC Rally Estonia considers important to participate in discussions of sustainable development together with scientists, other organisations and public. For that purpose we have joined the Rohetiiger (Green Tiger) programme as a founding member. Rohetiiger is a cooperation platform with an objective to become a representative organisation in sustainable development discussions, to lay down the foundation to balanced economy and to perform a green leap in Estonian society.

Key elements for WRC Rally Estonia 2022 will be to put effort into increasing the environmental awareness not only in the members of organisation and stakeholders but also among spectators, partners and teams. Environmental issues, such as selecting eco-friendly products and local services and reducing emissions are taken into consideration and uniquely identified with each partner company.

In order to promote environmental sustainability and enhance responsibility we aim to implement the following activities and ask our partners to follow them as well:

- Promote environmental awareness in all our channels and communication.
- Comply with all relevant laws and regulations, including environmental requirements and FIA Environmental Accreditation Programme.
- Require environmental responsibility from stakeholders, cooperative partners and suppliers pay close attention to cooperating with all landowners, residents and road owners.
- Set environmental objectives and targets, and measure them.
- Concentrate on energy efficient and sustainable solutions, for example using renewable energy sources when possible.
- Reduce the number of documents printed on paper, preferring digital formats and printing only the documents required by the FIA.
- Reduce carbon emissions - use hybrid or electric cars as most of the organisational vehicles, enable free of charge parking of hybrid, hydrogen and electric vehicles for the spectators, hold online meetings.
- If the COVID-19 pandemic ends, search for ways to optimise transportations and logistics to decrease emissions as much as possible: carpooling, public transportation.
- Make a thorough plan for emergency situations and implement it actively.
